

AYODELE AYOMIDOTUN

Frontend Developer

ayodeleayomidotun@gmail.com | 08065690839 | github.com/melchizedek2991 | Nigeria — Open to Worldwide Remote Opportunities

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive web applications using HTML5, CSS3, JavaScript, React, TypeScript, and Tailwind CSS. Experienced in developing reusable React components, handling asynchronous JavaScript, integrating REST APIs, rendering dynamic data, and building responsive user interfaces. Currently developing real-world applications including a JAMB Computer-Based Testing platform and a property management CRM. Brings a strong design background, practical problem-solving skills, and a continuous-learning mindset with an interest in collaborating with experienced software developers and working on real-world client projects.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, TypeScript, Tailwind CSS, Responsive Design

JavaScript & Web: DOM Manipulation, AJAX, Promises, Async/Await, Asynchronous Programming, API Integration, REST APIs, JSON

Backend: Node.js, Express.js

Development: Git, GitHub, Debugging, Reusable Components, Local Storage

Design: UI/UX, Figma, Adobe XD, Graphic Design, Typography, Visual Composition

Other: WordPress, SQL

EXPERIENCE

Founder & Freelance Web Developer — RawTech

Nigeria | Freelance

- Build and maintain responsive websites and web applications for clients and personal projects.
- Develop frontend interfaces using HTML, CSS, JavaScript, React, and responsive design principles.
- Integrate third-party services and APIs into web applications.
- Implement features based on client requirements and troubleshoot frontend issues.
- Apply UI/UX and graphic-design experience to improve visual hierarchy, typography, layout, and usability.
- Build mobile-responsive websites tailored to individual client brands and business needs.

Selected Client Project — Restaurant & Lounge Website

- Developed a responsive business website tailored to the client's brand and requirements.
- Implemented WhatsApp integration to provide a direct customer communication channel.
- Integrated embedded maps to help customers locate the business.
- Optimized the interface for mobile and desktop screen sizes.

FEATURED PROJECTS

RawTech CBT — JAMB Computer-Based Testing Application

React · TypeScript · Tailwind CSS · Node.js · Express · REST APIs

- Built a responsive JAMB examination practice platform with reusable React components for questions, options, navigation, timing, and results.
- Integrated external REST APIs and implemented asynchronous data retrieval and processing.
- Implemented state management for question navigation, answer selection, examination timing, submission, and result calculation.
- Developed an Express backend for API communication and question-data transformation.
- Implemented browser local storage for preserving examination attempt history and results.
- Designed the application with a mobile-first approach for students using different screen sizes.

RawEstate CRM

React · JavaScript · Tailwind CSS · Local Storage

- Built a responsive property-management CRM for managing properties, agents, and clients.
- Developed reusable React components for dashboards, navigation, forms, cards, and data presentation.
- Implemented CRUD workflows and client/property/agent relationships using browser local storage.
- Created responsive dashboard interfaces with statistics and data visualizations.
- Implemented dynamic navigation and reusable UI patterns across the application.

Recipe Finder

JavaScript · HTML · CSS · API Integration

- Built a responsive recipe-search application that retrieves and displays recipe information dynamically.
- Integrated an external API and handled asynchronous requests and responses.
- Implemented dynamic content rendering based on user searches.
- Created a responsive interface for mobile and desktop users.

EDUCATION

National Open University of Nigeria (NOUN)

B.Sc. Computer Science — In Progress

Villanova Polytechnic, Imesi-Ile, Osun State

OND — Computer Science

ALX Africa

Software Engineering Programme — Cohort 17

DESIGN BACKGROUND

Experience in branding, marketing graphics, promotional materials, typography, and visual composition. This background supports a strong understanding of visual hierarchy and user interface presentation.
